## 5 Powerful Membership Features You Get with Kleq

### 1. Private coaching via chat

A private chat feature like that of Kleq's allows the coach to interact with several members at once while maintaining the privacy of each member.

### 2. Push notifications

Notifications that alert members to activity relating to them, i.e. replies on chat or reactions to their posts, bring people back to the membership and encourage engagement.

### 3. Mobile access

Ultimate usability for your membership comes when users and coach can access it on their phones. Pair that with notifications and you've got the makings of some great engagement.

### 4. A fully-customizable solution

Kleq's flexibility allows just about any kind of customer experience. You can offer a course with however many weeks of coaching, then let customers upgrade if they want to a recurring membership. If you want 10 private chats, or 10 different private coaching arrangements with maybe even different coaches, it's all doable within one installation.

### 5. Everything in one place

Typically, if you wanted community, coaching and courses in one membership, you would need a number of different solutions to work together. Add to that a cart, a website and hosting, and you've got your hands full.

An all-in-one tool like Kleq gives you everything, including payment and hosting, on one platform. All you need is an email solution that will integrate with the software.
